About Oringer

Oringer has been a part of on-site ice cream making for decades. We understand the challenges in a competitive marketplace. Our experience creating superior variegates, flavor bases, purees, sherbet and water ice bases, waffle cone mixes and add-in dry mixes allows us to meet all of your needs, making us a primary partner to your success.

Besides being one of the largest private manufacturers of caramel in the United States, our in-house Research and Development team has created a wide product line, ranging from buttery caramel to wild cherry with black Bing cherry halves; creamy milk chocolate to the darkest sweet chocolate fudge; smooth marshmallow to fresh-shelled taste peanut butter. Our line also includes classic fruit flavors such as blueberry and strawberry, and anytime tropical favorites of mango and orange-pineapple.

Oringer's proprietary technologies enable us to guarantee absolute control over the final product, ensuring strict product tolerances and high quality on a batch to batch and case to case basis. We have long-standing success introducing innovative products – our No Sugar Added (NSA) and low fat variegates pack the same burst of flavor as our regular formulas.

We offer a wide selection of packaging including #10 cans, a variety of portion pouch packs, ½ and 1 gallon jugs, squeeze bottles and ready-to-use wide mouth jars. We are certified organic by QAI and certified kosher by the Orthodox Union.

Speak with an Oringer representative and let us show how our history in the ice cream industry can contribute to your business success.

These recipes are based on a 12-14% mix and 2.5 gallons.

SHERBET

A sherbet is a frozen dairy dessert. Sugar content is much higher than ice cream (up to 50%) and it is at least twice as acidic. The product is therefore much sweeter and tarter than ice cream. Standards of identity include total milk solids of 5% and 2% maximum milk fat solids. Fruit juice will be 2% minimum as citrus, 6% minimum as berry, and 10% minimum as other flavors. Overrun will be no more than 50%.

Handling:

- Mix all of your ingredients together thoroughly
- When flavoring using real fruit, add purees at 15-20% of your formula
- Place product in your cooler and let marinate for a minimum of 4 hours – no less. Overnight is always best

NEUTRAL SHERBET	
#10 can	Neutral Sherbet Base (#840)
10 lb	Sugar
4.5 gal	Warm water
1.5 gal	Ice cream mix
6 fl oz	Citric Acid Solution (#532G)

SORBET

A sorbet is a non-dairy frozen dessert. Typically considered a high quality dessert treat, it consists of the same ingredients as sherbet excluding the dairy product. Our #40678 **Neutral Sorbet Base** is designed to create a soft, creamy finished product every time and can be dipped at the same temperature as ice cream.

Handling:

- Mix all your ingredients together thoroughly
- When flavoring using real fruit, add purees at 15-20% of your formula
- Products should not be flash frozen overnight

WATER ICES – ITALIAN ICES – SORBETTO

Typically served in warmer temperatures, this is a non-dairy frozen treat. As opposed to sorbet, water ices do not normally include fruit juices and may not even include stabilizers. Production time is approximately 18-20 minutes. Water ices are not usually placed in a flash freezer prior to dipping but are placed directly into the dipping cabinet at a temperature of 15°F.

Handling:

- Mix all your ingredients together thoroughly
- When flavoring using real fruit, add purees at 15-20% of your formula
- Water ices can go straight to the dipping cabinet after running through your machine
